DEAR SIR: This community read the announcement of the appointment of — to the — Judgeship with astonishment and regret, if not pain. And none were more astonished than those who had signed his petition. And I regret to say that my name is to be found upon it. I have refused several whom I knew to be unfit, but I signed this one thinking it would never be considered and not for one moment believing the appointment was possible. When first presented to me I put him off and hoped to escape, but he came again with and booed to escape, but he came again with if, and, with others, I signed it thinking there was no chance for its reaching even a consideration. I think not a man whose name is on utation, among havings and reperation. It hink not a man whose name is on it had the remotest idea that his appointment was possible. Not one upon it would have appointed him had he the appointing power. He is not qualified morally or professionally. He is scarcely a lawyer at all, while the place will require a good lawyer. I do not wish to say more than to put you upon inquiry. We are friends and do business with one another, and it is upoleasant to have to say this. But it is due your responsibility, and from every one that signed that petition. And it was signed by many prominent men who hated to refuse, and hoped and thought it would result in the party. It is distincted that petition. And it was signed by many prominent men who hated to refuse, and hoped and thought it would result in and hoped and thought it would result in nothing. I do not wish you to take any action upon my representation, but if you wish

to know the real opinion of the signers of the petition, cause some of them to be addressed privately, and I think they will confess the Another cause of worry to the Republicans is the constantly accumulating objections to the appointment greater than 1 mass of evidence of the fraud and corhave intimated. The petition is signed by two of our Supreme Judges (—). Let them both be privately addressed, if it is not too were in possession of the Government. both be privately addressed, if it is not too late, and I think you will learn the facts.

WASHINGTON, August I, 1885

DEAR SIR: I have read your letter of the 24th ult with amazement and indignation. There is but one mitigation in the perfidy which your letter discloses, and that is found in the feet that you confess your share in it. I don't know whether you are a Democrat or not; but if you are the crime which you confess is the more unpardonable. The idea that this Administration, pledged to give the people better government and better officers, and engaged in a hand-to-hand fight with the bad elements of bath parties, should be better. by those who ought to be worthy of implicit trust is streetous; and such treason to the howling of its purblind organs will not eople and to the party ought to be punished avail against the settled conviction of Your confession comes too late to be of im- the people of the country that it is not
